 of Committee on Agricultural Productions for
 1855, 13; Report of Treasurer 13, 218; Premium
 List for Show of 1856, 17, and cover for July;
 delegates from, to various Societies in 1856, 121,
 223; order of Exhibition for 1856, 112;—election
 of officers of, 144, 147, 148, 176; Proceedings
 at annual meeting 145; address of J. T. Earle,
 Pres't. of, 145; discussion at, on drill husbandry
 146; Report from Ex. Com. to, 148; Reports of
 Judges at annual Show, 145 to 157; omission
 in report on sheep 166; change in location of rooms
 of, 308; trial of Reapers, &c. 315, 317, 377; annu-
 al exhibition of 1857, 315; subscriptions to pay
 debt of, 324
 Alderson, L. A. on a new enemy to wheat, 106
 American Farmer, notices of, 14, 240, 302; a new
 volume, 16, 48, 86, 346, 378, in Va. 106, 143; an
 important notice to subscribers 176; and Southern
 Planter 179; letter from Mr. Gowen, to editors of

208; agents for, 208; postage on, 262; in N. Caro-
 lina 303, 337, 368; in Penn. 371; change in loca-
 tion of office of, 308; testimony of an overseer, in
 favor of, 314
 Analysis, of American Co's Guano 13; of wheat
 and rye 33; on the value of, for soils, 311
 Anderson, Thos. B. on the use of mixed guanos 248
 Animals, dead, value of, for manure 235; cruelty to
 dumb, 313; care for working, 334
 April, hints for the month of, 297
 Apricots, budding and inoculating, 31
 Artichokes, Jerusalem, cultivation of, 258, 293
 Ashes, care and management of, 130, 235; for corn
 285, the component parts of leached 323
 Asparagus, cultivation of, 58, 103, 130, 185
 Atkinson, Gen. A. visit of, to Mr. Hewlett's farm
 170

B.

Baltimore, trade of, in produce, &c. for 1856, 242
 Barley, culture of, 259, 293; without beard, 189
 Bacon, loss of weight in curing, 87
 Beans, cultivation of, 32, 58, 334, 365
 Beef and Milk Cattle of England, 222
 Beer, recipe to make domestic ginger, 108
 Beets, Carrots, &c. harvesting of, 103; cultivation
 of, 237, 235; the sugar, 295, 364
 Birds, importation of rare, 57, 174; as checks on
 insects, 79
 Black, S. R. appeal by, for an Agricultural College
 in S. C. 343, 346
 Blood, of animals, as manure, 201
 Blew, Joel, on the cultivation of potatoes, 316
 Bones, value of, 130, 255, how prepared and com-
 pared with guano, 205
 Borecole, cultivation of, 334
 Bowie, W. W. W. 88; correspondence of, with Mr.
 Hewlett, on peas, 89
 Book Farming, an instance of advantage of, 345
 Books, periodicals, &c. receipt and notices of, 335,
 352, 145, 121, 52, 223, 276, 214, 120.
 Breadstuffs, importation of, into Sweden, 67; gam-
 bling in, and provisions, 86; the European market
 for, 113, 287.
 Breeding, treatise on the principles of stock, 26, 42,
 70, 122, 136; improving that of animals 54; how
 to secure male or female calves, 134; do. by Dod-
 dridge, 282
 Bridge, description of a wire suspension, 35
 Broccoli, cultivation of, 298, 366
 Browder, Robt. essay by, on cultivation of tobacco
 in Ky. 193
 Bryan, M. J. on classical literature, applied to ag-
 riculture, 166
 Buckwheat, harvesting of, 102; cultivation of, 365
 Budding and Inoculating fruit trees, 31, 91
 Butter, from an Alderney cow, 120; how to make,
 (see advertisement sheet of Nov. No.)
 C.
 C. O. P. experiments by, with De Burg's Super-
 Phosphates and Guanoes, 106
 Cabbages, cultivation of, 32, 58, 91, 103, 130, 219,
 298, 334, 366.
 Cabinets of soils, proposition for, by Prof. Stewart,
 68.
 Calves, on the rearing and management of, 325
 Candles, how to make dipped, 323
 Cantaleupes and Melons, cultivation of, 333
 Capital, use of in farming 50; by Whortleberry 66;
 by Mr. Mecchi, 118
 Cans and Jars, self-sealing for preserving fruits, 345
 Carrots, beets, &c. taking up 103, 234; cultivation
 of, 237, 296, 364

- Cashmere Goats, of R. Peters, description of, with cuts, 172
Cattle yards, how to manage, 102
Cattle, stall feeding, by Mr. Hewlett 17; essay on breeding 26, 42, 70; great sale of, by Col. Morris 59; to remove vermin from 77; importation of Devon, by Mr. G. Patterson 87; of Durhams 174; treatment of young 184, 212; sale of Devon, in Alabama, 201; of Durhams in Ky. 222; the Hereford, description of 215; Milk and Beef of England 222; trade of, in Baltimore, in 1856, 244; description of the Devon, Sussex, Ayrshire, Hereford, Sussex, Alderney, and short-horn 251 to 253; weights of short-horns 288; do. of a beef 300; Mr. Thorne's short-horns, 307; horn ail in 313, 345; Alderneys, portraits of Mr. J. H. McHenry's Faith and Charity, 328; raising and fattening of, in Va. 380
Cauliflowers, cultivation of, 32, 91, 298, 366
Celery, cultivation of, 32, 58, 91, 103, 130, 136
Cheese, making of, by a farmer's wife 171; constituents of, 341
Chemical, Analysis, as to the value of, 311
Cherries—see *Fruit Trees*.
Chinese Sugar Cane—see *Sugar Cane*.
Clay, Mr. our minister to Peru, charges against 285
Clay, Mr. experiments by, in cooking food for stock 375.
Clemson, T. G. on an Agricultural College 69, 162; on the preparation of seed wheat, 202, 212
Clover, gathering seed of, 60, 247; machine for 60; do. by Dr. Martin of Ky. 111; by E. Stabler 136; natural growth of, 74; sowing and cultivation of, 215, 247, 257, 334; treatment of a field of, in Va. 349; sown with orchard grass 89; its value and use, 247
Cisterns, how to make them, 127; by J. F. H. 134
College, Maryland Agricultural, resolution of State Ag. Soc. relative to, 148; by T. G. Clemson, 69, 80, 161; subscription to, by Miss A. Skinner 175; address of R. M'Henry, on the establishment of, 176; letters on, by L. S. Robbins and W. W. Corcoran 247
College, St. John's at Annapolis, 55, 68
College, Appeal for an Agricultural in S. Carolina, 343, 346; establishment of, in N. York, 354
Corn, premium offered for best manure for, by N. Y. Ag. Soc. 14; culture of, 34; by Mr. Hewlett 18; broadcast for fodder 24, 333, 364; for seed, cause of failure to germinate 57; plan of saving seed 74; average of crop in the several States 82; stalks, for cattle 102; cobs of, value of, 102, 125, 129, 315; hints on growing of, 126, 258, 297, 364; experiments in soaking, by Dr. D. Stewart, 133; on cultivation of, by J. Fife, 239; the Wyandotte 240, 282; Mexican White flint 283; ashes for, 285; planting, manuring, &c. 331; for roasting ears 334; the Hicks' seed 353; from Mr. Joynes 371
Corn Exchange, bulls and bears on the, 388
Cotton, a picker for, invented by Mr. Trowe 123; a plantation, and improved system for, 123; prospects for, in Europe 287; meal from seed of, for milch cows 300; increase in the crop of, 316; essay on the culture of, 329, 338, 346.
Cows, Milch, management of, 34, 102, 129, 184, 237, 271; points of dairy, 43; hints on feeding milch, 43, 251, 257; wintering of, and feed for, 125, 269; for dairy farming, 251, 267, 300, 325, 341; by T. E. Van Bibber 303; plans of stables for, 269; diseases of, 302, 325
Crops, prospects and results of the, for 1856, 11, 14, 15, 20, 21, 22, 24, 38, 43, 47, 53, 83, 107, 121, 127, 174; for 1857, 286, 329, 350, 330, 368, 371, 382 to 388; in Europe 54, 127; by Jno. Jones, 67, 237; average of, in U. S. of wheat, rye, oats and corn 82; comparison of, for several periods 158; hints on pitching, 259; on the rotation of, 181, 391; Fertilizing 209
Cucumbers, cultivation of, 32, 58, 334
Currants and Gooseberries, cultivation of, 130, 237
- D.**
- Dairy Farming, treatise on, 251, 267, 325, 341; feeding cows for butter 257; by W. R. King 300
Davis, A. B. experiments with Colombian and Peruvian guano 11; description by, of Davis' self-raker 12
Davis, B. F. S. on the Hessian Fly, 15
Dead animals, value of, for manure, 235
Department of Agriculture, report on to Congress 97
Dickinson, N. C. on the guano interdict, and the use of the manipulated, 324
Doddridge, on breeding animals, vineyard, &c. 281, 289.
Draining, necessity of, for wet lands 24, 129, 258, 333; and ditching 66; the advantages of, by Prof. Gray 108; do. by Prof. Warden 127; tile for 222; thorough, advantages of, 273; laying out under drains, 372
Drill, attachment to, for guano 47; by M. T. Goldsborough 105, discussion on drill husbandry, 146
Drought, protection from effects of, 284
Dulaney, R. H. importation of stock by, 315; a visit to the farm of, 380
- E.**
- Egg Plants, cultivation of, 32
Endives, cultivation of, 32, 58, 91, 103, 130, 300
Experimentor, on Sheep Husbandry, in Western Va. 337
- F.**
- Fallowing, for wheat, 34
Farm accounts, keeping of, at Ripon Lodge farm 297
Farm, a well managed, Mr. Hewlett's, 17, 49, 50, 89
Farming, high, in Scotland, 309
Farm Buildings, plan for, with cuts, 75, 269
Farm Work, for July 29; August 33; Sept. 65; Oct. 101; Nov. 129; Dec. 184; Jan. 219; Feb. 234; March 257; April 293; May 331; June 363
Faulkner, on the management of manures by 220
Farming, a system of, by Pomonkey 37; reply to, by the editors 49; thorough 84; improvement of, in N. Carolina 337; use of capital in 50, 89, 118; book, advantage of 345
Fences, live, Osage Orange 301; Wire, 374
Fender, screen, &c. a new invention of a, 107
Fertilizing Crops, experiments in, recommended 208
Fever and Ague, prevention of, by the Sunflower, 348
Fluids, burning, danger in the use of, 284
Flour, Georgia, 219; N. Carolina 169; trade of, in Baltimore, 242
Flowers, on the cultivation of, in August 58, Sept. 90, Oct. 125, Nov. 150, Dec. 189, Feb. 237, March 288, April 300, May 343, June 394
Fruit Trees, management of, 31, 236, 253, 300; planting out 102; for a new orchard 158; pruning 130; composition for pruning 132; manures for,

- 259; wash for 259; the King Apple 275, management of an orchard of, 275; by J. Folck, 337; by I. 368; manures for 276; cultivation of the peach, 367; from seed, 240
- Fife, Jas. on the value of the Cow Pea, 336
- Folck, Jno. on Orchard management, 337
- Fruit dried, how to preserve from worms 128
- Fruits, self-sealing cans for preserving 345, 347, 393
- Frost, action of on the roots of wheat 232
- G.**
- Gambling, in breadstuffs and provisions, 87
- Garden Work, for July 32; August 58, Sept. 90, Oct. 103, Nov. 130, Dec. 185; Jan. 219, Feb. 236, March 260, April 297, May 334, June 366
- Gilmer, G. C. on guano, Superphosphates, &c. 279
- Ginn, Geo. W. on the use of De-Burg's Superphosphates 248
- Goldsborough, M. T. on the guano attachment to wheat drill, 105
- Gooseberries and Currants, cultivation of, 130, 237
- Gowen, Jas. testimonial to, 143, 145; letter from to the editors 208
- Grain, will high prices continue, 159; thrashing out 219; trade in, in Baltimore, for 1856, 243
- Granaries, how to manage, 34
- Grape, culture of the, at the South, by Mr. Axt, 115; in the West 117, 119, 169; pruning the, 237; best varieties for this country 275; by Doddridge 281; in Maryland, by Maj. Giddings 345
- Grass, sowing seeds with wheat 18; the Rescue 38; the Blue of Va. and Ky. 380
- Grass Lands, how to improve, 171, 309; guano for 171; Ky. blue, its culture, 175
- Gray, Prof. on the advantages of draining 108
- Guano—National Convention, proceedings of, 1; Letter to the President U. S. on the subject of, 1, 12; Statistics of importations into Baltimore, 1; Report on the trade in, 3; notices of, by J. L. D. 15; by the editors, 19
- Guano, experiments with Peruvian and Colombian, 11, 12, 52, 106, 240; by Dr. D. Stewart 203; by G. C. Gilmer 280; analysis of, from American Co's deposits 13, 379; top dressing with, 19; letter of Mr. Clay, on use of, in Peru 45; drill for sowing with wheat, by T. F. Nelson 47; a newly invented wheat and guano sower, 392; by M. T. Goldsborough 105; sulphuric acid with, 47; home made 52, 239; used with lime, by Mr. Gilmer 280; trade in, with Peru 56, 314; H. K. Burgwyn, on the use of the drill for, and trade in, 56; as a top dressing for wheat 60; caution by State Inspector, against frauds in, 80; Mexican and Peruvian, by Mr. Milburn 290; by T. B. Anderson 248; by G. C. Gilmer 279; value of Colombian and other Phosphatic, by Prof. Haldeman 85; notice of a new deposit of, 85; decrease in demand for, 88; Superphosphates and guanoes, experiments with, 105, 167, 307; by C. O. P. 106; by Jas. Merrick 284; by W. H. Worthington 238, 291; by Wm. Holeman 371; by Mr. Crawley 389; by the editor 389; the Agency and sales of, in Baltimore, and New York 113; expected supply independent of Barreda 379; with peas, for wheat 124; caution to users of, having cuts or sores, 126; islands of, law of Congress for protecting discoverers of, 126; a supposed stimulant for the chinchbug 134; for grass lands, benefits of, 171; compared with bones 205; used with nitrate of soda for a top dressing for grass, 231; Reese's Manipulated 242; importations of, into Baltimore in 1856, 243; a new outrage by the Agency, in the sale of, 289, 347, 322, 307; comparative value with other kinds, and as to the economy of its use, by Mr. Newton 306; the Manipulated, by N. C. Dickerson 324; Cuban, a new discovery, 313; trade in, action of Md. State Agricultural Society 315; exports of, from Peru, 329; effects of, on poultry 350
- Gypsum, value of, for top dressing clover 170
- H.**
- H. C. P. on the improvement of lands in Va. 371
- H. on the Liebig and Lawes controversy 36
- H. H. on the sowing of seeds, 104; description by, of a Louisiana plantation 131
- Haldeman, Prof. on the Colombian and other Phosphatic guanoes, 85
- Hams, on curing 107
- Harvesting, preparations for, 29; drink for, 29; of wheat, 29, 363
- Herbs, cultivation of, 91, 103, 130, 299, 335, 367
- Hessian Fly, in Tenn. crops, 15; to prevent the hatching of the 55
- Hewlett, Jno. Q. visit to farm of, 17, 142; by Pomonkey 37, 49; by a subscriber 38; by Gen. Atkinson 170; correspondence by, with Mr. Bowie 89
- Hickok's Cider and Wine Mill, description of, with cut 14
- Horn-ail, in cattle 313; by Mr. Zollickoffer, 345
- Hussey, O. steam engine of, 203
- Holeman, Wm. on the crops, &c. of Va. 371
- Horses, compared with oxen 24; various breeds of, treatise on the, 44, 71, 109, 135, 190; essays on, 198 261; training balky 45; the Morgan, history of, with cuts, 78, 180, 216; importation of, 174; measurement of Black Hawk colts, 184; treatment of colts, and working animals 184; 264; premium essays on the farm horse, 198, 261, food for, 201, 265; death of Black Hawk 267; management of, 211; the best breed for a business 233; physic for 266; Mr. Rives Cleveland bay Emperor, with cut, 304, 308; points of a good, 305; breeding of farm, 310; importation of a Cleveland bay by Mr. Dulaney 315; on the anatomy of the 327; the secret charm for Taming 376
- I. J. K.**
- Ice House, how to make a cheap 74
- Ice Cream, how to make, 127
- Insects, in wheat, description of new, 106, 348; protection against, in fruit trees, 126
- Inoculating and Budding fruit trees 31, 91
- Jno. F. H. on building Cisterns, 134
- J. B. O. experiments by, on the use of barn yard manure with wheat, 106
- J. L. D. on the guano convention, crops, &c. 15
- J. M. B. on the means of destroying sorrel 38
- Johnson, Peyton, importation of pigs by, 39
- Jones, Jno. on the crops and prices of grain 67, 237
- Iverson's Rescue Grass, 38
- Kale, Siberian, cultivation of, 91, 298
- L.**
- Lands, wet, how to manage 24; worn out, renovation of, 66, 212; by J. Fife 238, grass, how to improve 171; advance in price of, in Md. 179, 212; in Va. 195, 354; improving of, in Va. 302, 371; in Talbot, Md. 302
- Leeks, cultivation of, 32
- Lettuce, cultivation of, 32, 58, 91, 103
- Leather, gearing, &c. a recipe for greasing 285
- Liebig and Lawes, controversy between, by H. 36
- Lime, quantity to the acre, by Mr. Hewlett 19; how applied with guano, 55

- Lockwood, H. H. Strawberries raised by, in Oct. 136.
- Locust, sowing seed of 235
- Longworth, N. proceeds of vinery of, 119
- Louisiana, description of a plantation in, by H. H. 131.
- Live Stock, the more of it, the more grain, 86
- Lucerne, cultivation of, and manures and soil for, 333.
- M.**
- Malaria, the Sunflower a protection from 349
- Mangel Wurtzel, cultivation of, 295, 364
- Markets, for June, see cover for July, and 64, 93, 128, 185, 204, 254, 272, 330, 350, 394.
- Mason, Hon. C., Com. of Patents, seeds and books from, 212, 213; circular from, on the cultivation of Chinese Sugar Cane, 249
- Manuring, for a rotation of crops 19, 89; green 181; with concentrated manures, by C. Friend 61
- Manures, treatment and application of, by Prof. Wolf, 79; how to make, in cattle yards 102; experiments with barn-yard on wheat 106; rough materials for 119, 129, 269; Tull on the use of, 124; from poultry 130; salt, as a, for potatoes and turnips 170; materials for making, 185; a new kind, by Mr. Rotch, 201, 283; experiments by Dr. D. Stewart 203; Super-Phosphates, by Dr. Sim, 204, 239, 279; in Europe, 207; management of, by Faulkner, 220; for top dressing of wheat 231; liquid, value of 235; sources of supply of, 234; hauling out, 293; on surface 308, 337, 368; for corn 332; for lucerne 333
- Martin, Dr. S. D. of Ky. description by, of a clover seed gatherer, 111
- Maury, Lieut. on the prevention of Ague and Fever by the sunflower, 348
- Meadows, setting timothy 34, 66; management of, 260.
- Mechi, Mr. at Tiptree, Eng. on Capital in farming 118.
- Melons, cultivation of, 32, 58, 333, 334; the Orange Water, 283
- Merrick, Jas. on the use of De Burg's Super-Phosphates, 284
- M'Henry, R. address of, at annual meeting of Md. State Ag. Society, 176
- Meteorological tables, 61, 93
- Milburn, R. N. on the value of the mixture of Mexican and Peruvian guanoes, 298

C. S. WAINWRIGHT'S FIRST PUBLIC SALE OF

Thoroughbred North Devon Cattle,

To be held at 'The Meadows,' the 17th June, 1857.

THE subscriber intends holding his First Public Auction of North Devon Cattle, on the above mentioned day, at his residence, "The Meadows," 4 miles North of Rhinebeck Station, on the Hudson River, R. R. The animals to be sold will number between 30 and 35 head, males and females, from calves to full grown—all of which have been either bred or imported by himself, and have perfect Herd Book pedigrees. As a lot, he believes he may say with truth, they are fully equal to any ever yet offered to the farmers of the United States. Among the number will be the imported Bull Mayboy (71) and the imported Cows, Nonpareille, (924) and Moss-rose, (904).

Catalogues containing full pedigrees, and all necessary information are now ready, and will be sent to all desiring it. The subscriber will be happy to have gentlemen visit his herd at any time.

Q7—All the Sales will be *bona fide*—and no animals on the catalogue will be disposed of until the Auction.

C. S. WAINWRIGHT,

KETCHUM'S PATENT REAPING AND MOWING MACHINES.

R. SINCLAIR, JR. & Co., have made arrangements with the makers of Ketchum's celebrated Reaping and Mowing Machines, and they respectfully inform their customers that a large supply will be in store without delay, and orders will receive prompt attention. Ketchum's machines are made exclusively with wrought iron frames, and are now considered one of the best, most compact and durable patterns in this country.

Materials, workmanship and performance guaranteed to any reasonable extent.

PRICES AS FOLLOWS:

Ketchum's Patent Mowing Machines,	\$110
" Patent Reaping and Mowing Machine Combined,	\$140

We will also keep for sale Hussey's PATENT REAPING MACHINES, with late improvements, and ATKINS' SELF-RAKING REAPER and MOWING MACHINES. Both these stand high in the estimation of farmers and machinists, and rank among the best.

PRICES AS FOLLOWS:

Hussey's Reaping Machine,	\$105	\$130
" Reaping and Mowing Machine Combined,	\$115	\$140
Atkins' Self-Raking Reaping Machine,	\$175	
" Self-Raking Reaping and Mowing Machine Combined,	\$200	

Orders for Reaping Machines, other than the above, will be received, and all possible attention given to ensure success, on such, however, no guarantee will be given.

R. SINCLAIR, Jr. & Co.,
62 Light Street, Baltimore.

For Sale—A Beautiful and Valuable Farm

About 19 miles from Baltimore, convenient to rail road and turnpike, containing from 100 to 300 ACRES. If the character of the soil, level character of the land, freedom from stone, health, convenience, beauty of location, the character and condition of the buildings, the facility of procuring lime and other fertilizers, and of getting produce to market; convenience to post office, smith and church, are considered, a more desirable property either for a working farmer or a country gentleman, for the price required, will not be easily found. Aware of the too common fact that untruthful advertisements often seduce purchasers into unnecessary trouble, the advertiser neither wishing to deceive, nor give nor take unnecessary trouble, will remark, that by calling at No. 12 North Howard Street, an accurate description, with the price, will be found.

jel-1f.

GREAT IMPROVEMENT IN RAILWAY THRESHING MACHINERY.

The very best Machine, at the lowest possible Price.

OUR POWERS are of the most durable pattern; the platform is longer than any other, and has a covering of inch boards to protect the lagging; when these wear out, any one can replace them, at a trifling expense. The band wheel will go on either side of the power; the cogs of the pinions are chilled, which prevents their wearing, and the power is mounted on two wheels, by which it may be easily moved.

Our THRESHERS have the most durable iron cylinders yet invented; the teeth have never been known to break out; the boxes have self-oiling cups, which insures the journal to be always lubricated without wasting oil—this prevents all heating, and consequent wear of the boxes, and is an invaluable improvement in Threshers. The small wheels and cog gear of the Power are oiled by a similar arrangement. Our shakers are driven by the main band, and require less than half the power used by the ordinary method. The shaker pulley will fit on the horse power, and may be used for driving any machinery requiring a slow motion. Our Two-horse Power, with a pair of light horses and three or four hands, is capable of threshing 175 bushels of wheat, or double that amount of oats, per day. We warrant our machines to thresh clean, not to crack the grain, to be durable, and, owing to the diminished diameter of the cylinder and the improved method of driving the shaker, to require less power than any other machine.

The complete two-horse machine will consist of a double Railway Horse Power, a 24-inch iron cylinder Thresher, a Shaker, 30 feet of 3½ inch india rubber belting, fixtures for hulling clover-seed, a pair of hooks to fasten the threshers to the floor, a pair of self-feeding oil cups for the power, a wrench, tin covers for the oil cups, and an oil can. Price \$145, delivered in Baltimore.

With the one-horse Machine will be sent a 24-inch threshers, and all the fixtures enumerated above. Price \$125 in Baltimore.

Persons interested will please write early to W. W. DINGEE & CO., York, Pa., and receive a circular. jel-1t

AULT'S ENGLISH GARDEN SEEDS.

WE are now prepared to supply AULT'S Improved SWEDE or RUTA BAGA TURNIP, SKIRVING'S RUTA BAGA YELLOW HYBRID, WHITE GLOBE, RED TOP NORFOLK and WHITE FLAT NORFOLK TURNIPS. SAMUEL AULT & SON,
Corner Calvert and Water-sts., Baltimore.
Orders by mail promptly attended. jel-1t

DEVON BULL FOR SALE.

HE is 2 years old, represented as a splendid animal, by one of the best judges of stock—sired by *Ploughboy*, which took the first premium at Md. State Show, when exhibited here, and out of *Netta*, which was sold by Mr. Holcomb for \$200; the sire and dam were the two finest animals ever owned by Mr. H. Price \$100, delivered in Baltimore.

Also a Devon Bull, 14 months old—though a perfect assurance of purity cannot be given; he is a beautiful; well formed animal, with all the appearance and characteristics of a thorough bred, except color of nose, which is too dark. Price \$50. Apply to the Editors of this paper. jel-1t

WANTED, DURHAM BULL.

WANTED to send to the mountains of western Virginia, a Durham Bull, to be bred to native Cows. He must be thorough bred. Any one having such a Bull which they are willing to sell at a very low price may find a purchaser by addressing "Farmer, Box 741, Baltimore Post Office," giving price, size, age, colour, &c. &c. jel-1t
